RESEARCH STATEMENT

My research interests lie in programming-language semantics, especially probabilistic programming, and in causal inference, type systems, and formal verification. I study how formal semantics makes programs and causal models precise, how type systems enforce invariants, and how verification establishes that implementations satisfy their specifications. My broader goal is to develop rigorous foundations for reliable computational systems. Before moving into research, I worked on reliable, air-gapped software systems at Google Cloud.

PUBLICATIONS

Graph Surgery and the Do-Operator: A Precise Correspondence for Acyclic Structural Causal Models

EDUCATION

Ashoka University

Bachelor of Science (Honours) in Computer Science

Major CGPA: 3.74/4

Sonipat, Haryana

Aug 2018 - Apr 2022

RELEVANT COURSEWORK

Discrete Mathematics; Algorithm Design and Analysis; Linear Algebra; Calculus; Abstract Algebra; Probability Theory; Programming Language Design and Implementation; Operating Systems; Computer Networks; Computer Security and Privacy.

SUMMER SCHOOLS AND WORKSHOPS

- [Indian School on Logic and its Applications \(ISLA 2026\)](#) · Krea University · Jun 25–30, 2026. Courses: Programs and Proofs; Computability Theory.
- [Formal Methods Update Meeting 2026](#) · Krea University · Jul 2–3, 2026.

RESEARCH AND PROFESSIONAL EXPERIENCE

Ashoka University

Research Associate · Programming Languages

Sonipat, Haryana

Jun 2026 - Present

- Studying semantics of programming languages, computational effects, and categorical approaches to programming-language foundations.

Firebolt

Software Engineer · Self-hosted Platform

Bangalore, India

Nov 2025 - Mar 2026

- Joined the founding engineering team building Firebolt's first self-hosted platform for isolated, air-gapped enterprise deployments, including feature flags and Temporal workflow orchestration.

Google

Software Engineer · Google Cloud, Distributed Cloud Team

Bangalore, India

Mar 2024 - Sep 2025

- Built software for Google Distributed Cloud, bringing Google Cloud services into air-gapped, sovereign, and regulated environments through distributed systems that operated without public-network dependencies.
- Designed a Harbor-based artifact registry for a 40kg portable data center, adding Kubernetes self-healing, node-local fallback mirrors, and image signature verification to support offline bootstrap and operation.

- Built APIs and observability tooling for Prometheus/Grafana monitoring, covering system health, storage, image-pull latency, error rates, alerting, and dashboards for internal teams and deployment operators.
- Mentored junior engineers and hosted a summer intern who later joined full time.

Google

Bangalore, India

Strategic Cloud Engineer · Google Cloud

Jul 2022 - Mar 2024

- Helped enterprises become cloud-native on Google Cloud, combining technical consulting, hands-on implementation, and architecture guidance across cloud infrastructure projects.
- Researched and prototyped Data Insights, an LLM-powered natural-language layer for tabular data discovery, testing generated questions, SQL guardrails, accuracy, and latency for cold-start exploration of unfamiliar datasets; the capability later became part of a Google Cloud data management product.
- Built reusable cloud and data tooling, including Terraform modules for Kubernetes clusters and VPCs alongside open-source Dataproc templates for Spark/Hadoop ETL.

TEACHING

Ashoka University

Sonipat, Haryana

Teaching Fellow · [Data Structures and Algorithms \(CS-2212-1\)](#)

Monsoon 2026

- Teaching with [Prof. Aalok Thakkar](#) in the Monsoon 2026 offering of the course.

AshokaX

Online

Teaching Assistant · Machine Learning

Apr 2022 - Jun 2022

- Assisted [Prof. Debayan Gupta](#) in teaching machine learning to high school students.

Ashoka University

Sonipat, Haryana

Teaching Assistant · Computer Organization and Systems

Monsoon 2021

- Assisted [Prof. Manu Awasthi](#) with Computer Organization and Systems in Ashoka's Computer Science department.
